Total functions	Modules	AI-powered	Real-time

All modules | Auth & orgs | Projects & tasks | AI review | Analytics | Notifications | Settings

Auth & user management

6 functions

Register
Sign up with email + password, creates user account

Login
Email/password login, issues JWT access + refresh tokens

GitHub OAuth
One-click login via GitHub account

Token refresh
Silently renews access token before it expires

Logout
Invalidates session, clears tokens from client

Profile update
Edit display name and avatar

Organisation management

6 functions

Create org
Create a named workspace, creator becomes admin

Invite member
Send invite link via email to join the org

Accept invite
New member joins org via unique invite token

Assign role
Admin sets member role: admin / member / viewer

Remove member
Admin removes a user from the org

Org switcher
User switches between multiple orgs they belong to

Projects & task board

12 functions

Create project
New project with name, description, and repo link

Archive project
Soft-archive a finished project, keeps history

Create task
Add a card with title, description, labels, due date

Edit task
Update any task field inline

Delete task
Hard delete a task with confirmation prompt

Assign task
Assign one or more members to a task card

Move task
Drag card across columns — updates live for all members

Set due date
Date picker on task card, shows overdue in red

Add label
Colour-coded labels (bug, feature, chore, etc.)

Task comment
Threaded comments on each task card

Link PR to task
Attach a GitHub PR to a task card directly

Filter board
Filter cards by assignee, label, or due date

AI code review

6 functions

Connect GitHub repo
Link a GitHub repo to a Velocyte project via OAuth

Fetch open PRs
Lists all open PRs from the linked repo

Run AI review
Sends PR diff to Gemini, returns quality score + issues

View review report
Diff viewer with inline AI comments by severity

Review history
See all past AI reviews for a PR across pushes

Score trend chart
Line chart of code quality score over time per repo

Analytics & velocity

5 functions

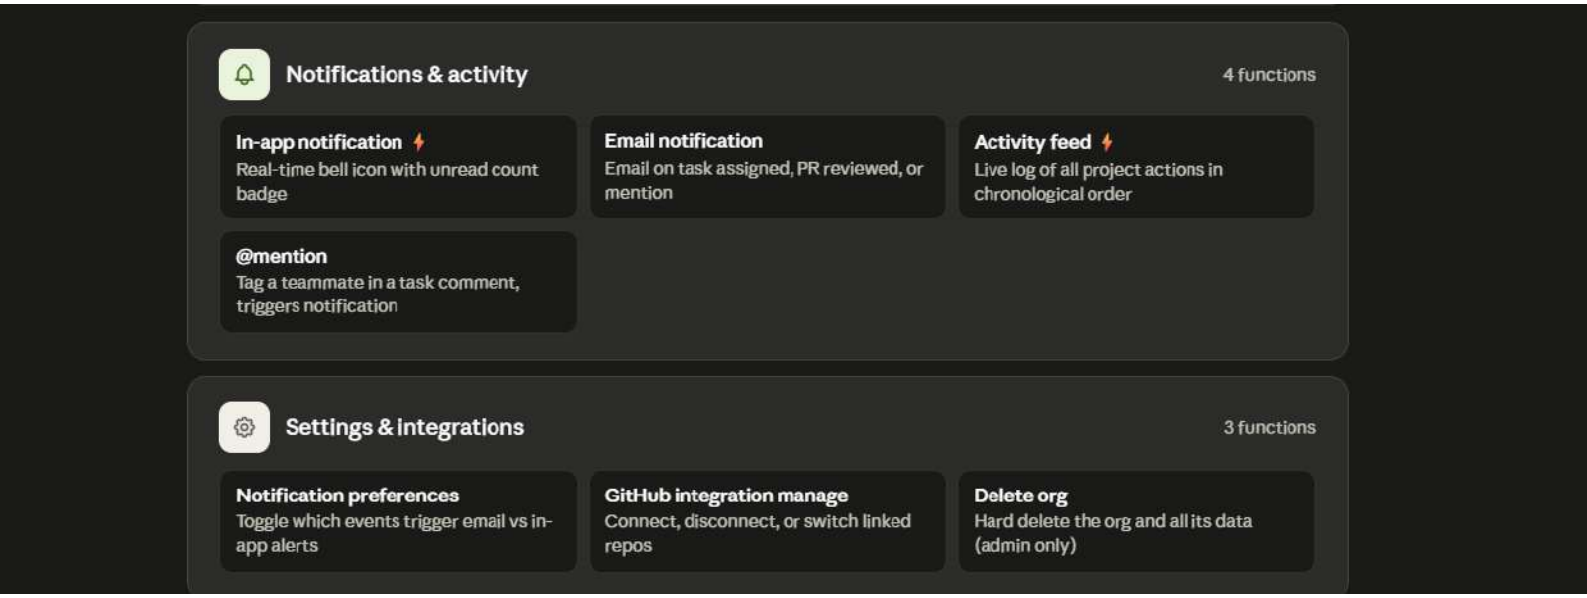

Velocity chart
Bar chart of tasks completed per week per project

Cycle time report
Avg days a task spends in each board column

Contribution heatmap
GitHub-style heatmap of who did what and when

PR quality trend
Code review scores over time per member/repo

Bottleneck alert
Flags tasks stuck in one column beyond a threshold

Notifications & activity
4 functions
In-app notification
Real-time bell icon with unread count badge
Email notification
Email on task assigned, PR reviewed, or mention
Activity feed
Live log of all project actions in chronological order
@mention
Tag a teammate in a task comment, triggers notification
Settings & integrations
3 functions
Notification preferences
Toggle which events trigger email vs in-app alerts
GitHub integration manage
Connect, disconnect, or switch linked repos
Delete org
Hard delete the org and all its data (admin only)
